

# Care & Maintenance

## How to look after your Richlite

Richlite is a dense and durable surface product, ideal for many demanding applications. The material has been finished with Richlite Color Enhancer or Osmo Hardwax Oil to help protect the surface for everyday use.

For routine cleaning, wipe the surface daily with a damp sponge or cloth. Do not use abrasive cleaners or scouring pads as they will scratch the finish. Warm, soapy water should be used on tough stains, however using soap or alkaline cleaners, such as bleach products, will dull the surface.

As the surface is worn, you should rejuvenate it with Howards Naturals. The oils and waxes in Howards help maintain the surface finish and keep it looking great for the life of the product.

Do not use Howards as a cleaner to avoid a wax build up which makes the surface sticky and patchy. As a general guideline, this polish should not be used more than 3 to 4 times per month.

Apply Howards Naturals by spraying it onto a microfibre cloth or directly onto the surface. Wipe the finish across the whole surface evenly, avoiding any streaks or spots. Wipe off any excess with a clean, dry cloth and leave to dry untouched overnight.

If you have any questions about how to care & maintain Richlite, please contact your local distributor.
